Hi everyone,

As promised at this morning's check-in, here is the quick summary that Peter pulled together. As in the past, we expect to get more detailed instructions from OP on implementing these actions within EPA.

In the meantime, Peter or I may be reaching out to fulfill requests we are getting from OP directly. Two immediate items due COB today:

- 1) List of actions with Statutory deadlines between now and June 30, 2021. We pulled this from the ADP Tracker, but it is not clear that we have the PRIA dates so I've reached out to Stephen Schaible. Peter and I will share the list of actions, along with a list of other upcoming statutory deadlines that go beyond that date.
- 2) List of signed but not published FR Documents – I will share the matrix in a separate email that will include the DDs that signed the FRNs. We need to sort them and identify which need other action (supplemental info, redo, extensions etc).
- 3) Updates to ADP Tracker, especially for anything with internal milestones between now and June 30, 2021. There are a lot of past dates for the non-ADP pesticide actions, but we have made the updates that were provided already. My staff are working today to update the old planned dates – If we can't find a completed date, we will ask the lead for a new planned dates.

Thanks, Peter. This is a very helpful summary!

- Angela
